### Print

Final step of the light panel is to choose, design and manufacture the desirable print you want to light up. Every standard PVC film and rigid print works perfectly with Leddex light panels

### Acrylic sheet

The most important part of the light panel. Acrylic sheet design for even light distribution on the entire surface of the product, leaving no room for hot spots or darker areas you want to light up

### Reflector

A flexible material designed for supreme light reflection and color enhancement, making the most of LED lighting and acrylic sheet

### Lumaire LED tape

High power LED strips with integrated Intelligent Control (IC) system for ultimate reliability and maximum lighting effect.

### Magnetic frame

To deal with the heat LED bar is generating, high cooling efficiency aluminum frame are used to cool down the LED bar and to ensure optimal operating temperatures and long life span of the product
